

## Table of Contents

Chapter 1: .....	<b>1</b>
1. Introduction:.....	1
1.1. Antarctica: An Introduction .....	2
1.2. Indian Scientific Expedition to Antarctica:.....	3
1.2.1. History.....	3
1.2.2. Location and Climatic conditions .....	3
1.2.3. Lifestyle at Antarctic Station .....	4
1.3. Expedition Voyage to Antarctica.....	5
1.4. Challenges to humans in Antarctica.....	5
1.5. Adaptation key to survival .....	6
1.6. Yoga - A benefactor for health and wellness .....	9
1.7. Yoga in Stress .....	10
1.8. Yoga and Exercise: A comparison of efficacy.....	11
1.9. Yoga: An Evolution friendly way of life .....	12
1.10. Motive for the Study .....	14
Chapter 2.....	<b>15</b>
2. Literary Review .....	15
2.1. Background .....	15
2.2. Aim & objectives:.....	19
2.3. Materials and Methods:.....	19
2.4. Origin of Universe & its present-day understanding .....	20
2.5. Origin of universe according to Indian Scriptures .....	24
2.6. Origin of Life forms according to modern theories .....	28
2.7. Origin of Life Forms according to <i>Nāsadiya sūkta</i> .....	29
2.8. Factors governing human lifeforms .....	32
2.9. The Nature of human mind .....	37
2.10. Disease and its manifestation .....	38
2.11. Yoga: An elixir for humans .....	49
2.12. Summary: .....	74
Chapter 3:.....	<b>77</b>
3. Review of Literature .....	77
3.1. Psycho physiological changes in humans visiting Antarctica.....	77
3.1.1. Sleep in Antarctica.....	79

3.1.2.	Pituitary responses in Antarctica.....	80
3.1.3.	Immune system regulation in Antarctica .....	81
3.1.4.	Cognition and negative affect in Antarctica.....	82
3.1.5.	Positive affect.....	83
3.2.	Yoga.....	85
<b>Chapter 4.....</b>	<b>87</b>	
4.	Aims and Objectives .....	87
4.1.	Aims of the Study: .....	87
4.2.	Objectives of the Study: .....	87
4.3.	Hypothesis: .....	87
<b>Chapter 5.....</b>	<b>88</b>	
5.	Methodology .....	88
5.1.	Participants / Subjects: .....	<b>88</b>
5.1.1.	Screening Procedure .....	88
5.1.2.	Inclusion and Exclusion Criteria.....	89
5.1.3.	Ethical considerations .....	90
5.1.4.	Study Setting .....	90
5.1.5.	Sample Size Calculations .....	90
5.2.	Study Design .....	90
5.3.	Trial Profile.....	91
5.4.	Data Collection: .....	95
5.4.1.	Blood sample Collection.....	95
5.4.2.	Psychological assessments .....	96
5.5.	Assessments .....	96
5.5.1.	Psychological Assessments:.....	96
5.5.2.	Biochemical Tests .....	97
5.5.3.	Serum Biomarker Assessments.....	97
5.5.4.	Global Gene Expression.....	98
5.6.	Statistical Analysis.....	102
5.6.1.	Biochemical and Psychological parameters:.....	102
5.6.2.	Gene expressions.....	102
<b>Chapter 6:.....</b>	<b>108</b>	
Results.....	108	
Recapitulation: .....	108	

6.1.	Socio-demographic and Medical Characteristics of the study samples.....	109
6.2.	Psychological Assessments.....	109
6.2.1.	Pittsburgh Sleep Quality Inventory:.....	109
6.2.2.	Perseverative Thinking Questionnaire [PTQ].....	110
6.3.	Biochemical Assessments.....	110
6.4.	Molecular Biology Assessments:.....	120
6.4.1.	Cortisol Assay.....	120
6.4.2.	IL-2 Assay.....	120
6.5.	Exploratory Gene Expression Analysis:.....	120
6.5.1.	Classification of Differentially Regulated Genes.....	120
6.5.2.	Over representation Analysis of Differentially Regulated Genes.....	140
6.5.3.	Gene Set Enrichment Analysis.....	160
6.5.4.	Transcription Factor Profiling.....	163
6.5.5.	Common NCDs and associated gene expression in the Extreme environment.....	178
6.6.	Conventional Gene expression Analysis (Stringent Protocol).....	182
6.6.1.	Gene Ontology Analysis.....	182
6.6.2.	Over Representation Analysis.....	195
6.6.3.	Statistical Enrichment Analysis.....	200
6.6.4.	Transcription factor Profiling.....	203
<b>Chapter 7</b>	<b>.....</b>	<b>205</b>
	Discussion.....	205
<b>Chapter 8</b>	<b>.....</b>	<b>235</b>
	Appraisal.....	235
<b>References</b>	<b>.....</b>	<b>237</b>

## List of Annexures / Tables / Colour Plates

### Colour Plates:

1. Common area / images of Antarctic station and Research Vessel
2. Group performing Yoga practices inside research vessel
3. Group performing yoga practices on Ice shelf
4. 35<sup>th</sup> Indian Scientific Expedition to Antarctica team

### Appendices:

Number	Description	Page
1	IEC Certificate	A1
2	Process of Yoga module designing and validation	A2
3	Efficacy of Kunjal Kriya on pulmonary functions	A10
4	Scoring key for Psychological Assessments	A23
5	Protocol for biochemistry tests	A26
6	Protocol for estimation of biomarkers	A30
7	RNA Extraction protocol	A31
8	Bioanalyser protocol	A34
8a	RNA Yield, Quality Control and Electropherogram	A38
9	Single colour Gene expression protocol	A40
9a	QC for Microarray	A49
10	Sample allocation on slides	A52
11a	Significantly regulated pathways – BL-P1	A53
11b	Significantly regulated pathways – P1-P3	A58
11c	Significantly regulated pathways – BL-P3	A63
12	Differentially regulated Transcription Factors in exploratory analysis	A82
13	Differentially regulated Transcription Factors in stringent analysis	A117
14	Raw data of biochemistry tests	A120
15	Raw data of Psychology tests	A132

**Tables:**

<b>Number</b>	<b>Description</b>	<b>Page</b>
2.1	Cosmological theories	22
3.1	Summary of symptoms in Antarctica	84
5.1	Validated Yoga module administered during sea voyage and at Antarctica	94
6.1	Baseline demographic data (Mean±SD) and test for normality at baseline in both the groups	109
6.2.1	Sleep quality in Yoga and Control groups (Mean±SD) at the baseline and completion (P3) of the expedition measured using Pittsburgh Sleep Quality Index	112
6.2.2	Perseverative Thinking in Yoga and Control groups (Mean±SD) at the baseline and completion (P3) of expedition measured using Perseverative Thinking Questionnaire	113
6.3.1	Lipid profile, liver and kidney function tests in Yoga and Control groups at the timepoints P1 and P2	114
6.3.2	Lipid profile, liver and kidney function tests in Yoga and Control groups at the timepoints P1 and P3	115
6.3.3	Lipid profile, liver and kidney function tests in Yoga and Control groups at the timepoints P2 and P3	116
6.4.1	Serum Cortisol levels (Mean±SD) in Yoga and Control groups at P1, P2 & P3	120
6.5.1A	Gene Ontology classifications of Differentially Expressed Genes for timepoint - Baseline versus Post1 in Control and Yoga groups	128
6.5.1B	Classification of genes based on Gene Ontology of Differentially Regulated Genes for timepoint – Post1 versus Post3 in Control and Yoga groups	133
6.5.1C	Classification of genes based on Gene Ontology of Differentially Regulated Genes for timepoint – Baseline versus Post3 in Control and Yoga groups	138

6.5.2	Over-representation analysis of Differentially Expressed Genes for each timepoint comparison in Yoga and Control groups using PANTHER database	147
6.5.3A	Top 20 significantly regulated pathways in Baseline – Post1 timepoints	160
6.5.3B	Top 20 significantly regulated pathways in Post1 – Post3 timepoints	161
6.5.3C	Top 20 significantly regulated pathways in Baseline – Post3 timepoints	162
6.5.4	Over-representation analysis of Transcription factors	166
6.6.1	Significantly regulated gene ontologies in stringent protocol using DAVID database tested for multiple corrections with level of significance fixed at p<0.05	183
6.6.2	Over-Representation Analysis of $\geq 2$ -fold Differentially regulated genes in the stringent protocol	195
6.6.3	Significantly regulated pathways from stringent gene list analysis for timepoints BL-P1 and P1-P3	200
10.2.1	Rationale for selection of Yoga practices	A6
10.2.2	The list of Yoga practices proposed for Antarctica along with the scores given by the experts and the corresponding CV Ratio	A7
10.2.3	The list of Yoga practices proposed for Sea Voyage along with the scores given by the experts and their corresponding CV Ratio	A8

## Figures

Number	Description	Page
1.1	Model representing neurological regulation of chronic stress by Yoga	13
3.1	Immune System Regulation	81
5.1	Trial Profile	93
5.5.4	Box plot of Normalised intensity values of all samples included for microarray analysis	
5.6.2	PCA plot for control probes in all the 36 samples across two groups and three timepoints	
6.1 a	Changes in Glucose and Lipid profile values in Yoga and Control groups in the timepoints P1, P2 and P3.	117

6.1 b	Changes in Renal Function test values in Yoga and Control groups in the timepoints P1, P2 and P3	118
6.1 c	Changes in Liver Function test values in Yoga and Control groups in the timepoints P1, P2 and P3	119
6.5	Venn diagram representation of differentially expressed genes across groups and time-points	124
6.5.1a	Classification of genes based on Gene Ontology– Biological Process of Differentially Regulated Genes for timepoint - Baseline versus Post1 in Control and Yoga groups	125
6.5.1b	Classification of genes based on Gene Ontology – Molecular Function of Differentially Regulated Genes for timepoint - Baseline versus Post1 in Control and Yoga groups	126
6.5.1c	Classification of genes based on Gene Ontology – Protein Class of Differentially Regulated Genes for timepoint - Baseline versus Post1 in Control and Yoga groups	127
6.5.1d	Classification of genes based on Gene Ontology – Biological Process of Differentially Regulated Genes for timepoint – Post1 versus Post3 in Control and Yoga groups.	130
6.5.1e	Classification of genes based on Gene Ontology – Molecular Function of Differentially Regulated Genes for timepoint – Post1 versus Post3 in Control and Yoga groups	131
6.5.1f	Classification of genes based on Gene Ontology – Protein Class of Differentially Regulated Genes for timepoint – Post1 versus Post3 in Control and Yoga groups.	132
6.5.1g	Classification of genes based on Gene Ontology – Biological Process of Differentially Regulated Genes for timepoint – Baseline versus Post3 in Control and Yoga groups	135
6.5.1h	Classification of genes based on Gene Ontology – Molecular Function of Differentially Regulated Genes for timepoint – Baseline versus Post3 in Control and Yoga groups	136
6.5.1i	Figure representing Gene Ontology classification – Molecular Function of Differentially Regulated Genes for timepoint – Baseline versus Post3 between Control and Yoga groups	137

6.5.2a	Over-Representation analysis of over(+) and under(-) represented Biological Processes for DEGs in Baseline-Post1 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	154
6.5.2b	Over-Representation analysis of over(+) and under(-) represented Molecular Functions for DEGs in Baseline-Post1 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	155
6.5.2c	Over-Representation analysis of over(+) and under(-) represented Protein Class for DEGs in Baseline-Post1 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	155
6.5.2d	Over-Representation analysis of over(+) and under(-) represented Biological Processes for DEGs in Post1-Post3 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	156
6.5.2e	Over-Representation analysis of over(+) and under(-) represented Molecular functions for DEGs in Post1-Post3 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	157
6.5.2f	Over-Representation analysis of over(+) and under(-) represented Protein Class for DEGs in Post1-Post3 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	157
6.5.2g	Over-Representation analysis of over(+) and under(-) represented Biological Process for DEGs in Baseline-Post3 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	158
6.5.2h	Over-Representation analysis of over(+) and under(-) represented Molecular functions for DEGs in Baseline-Post3 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	159
6.5.2i	Over-Representation analysis of over(+) and under(-) represented Protein Class for DEGs in Baseline-Post3 timepoints in Yoga and Control groups and human annotated genes in PANTHER database	159

6.5.4	Over Representation Analysis of Differentially Regulated Transcription Factors in Yoga and Control Groups	165
6.5.5a	Genes associated with disease in Yoga and Control groups in BL-P1	179
6.5.5b	Genes associated with disease in Yoga and Control groups in P1-P3	180
6.5.5c	Genes associated with disease in Yoga and Control groups in BL-P3	181
6.6.4	Differentially expressed transcription factors in Stringent protocol	204
